

MARCIN WRZOŚ

JUNIOR FRONTEND DEVELOPER

PORTFOLIO

PROFILE

I have experience in working on non-commercial projects with senior developers. I am a person who is characterized by a 'can-do' attitude and I am always trying to overcome the issue on my own.

I am able to write responsive pages in React with Typescript in line with the newest standards.

HOW TO REACH ME

Phone: +48 662 623 531

University of Wrocław

Bachelor of National Security
2014 - 2017

PROJECTS

Foodie

Foodie is an application written in React and Typescript with custom hooks like usePagination, useAxios or useMutation, project uses communication via http with the external Api spoonacular. The application is connected to a backend server, which allows users to register and login. The backend server is responsible for storing user data and handling authentication requests. You can find the popular recipes, search for them by a category, specific name, see details of each recipe or add to favourites. Project is hosted on Netlify at this [link](#).

Portfolio

React with Typescript application which depicts my resume. Project is responsive and works on mobile devices. Functions responsible for the Day and Night mode have been moved to Context API. You are able to send me an email by contact form, which is implemented by EmailJS.
