

MARCIN WRZOŚ

JUNIOR FRONTEND DEVELOPER

PORTFOLIO

PROFILE

I have experience in working on non-commercial projects with senior developers. I am a person who is characterized by a 'can-do' attitude and I am always trying to overcome the issue on my own.

I am able to write responsive pages in React with Typescript in line with the newest standards.

2014 - 2017

PROJECTS

Foodie

[View code](#) and [demo](#)

Tech Stack: React, custom Hooks like usePagination, useAxios, useMutation, Typescript, react-router, Context API, ReactSlick.

Foodie is a versatile application that communicates via http with the external API Spoonacular, offering a rich repository of recipes. Seamlessly integrated with a secure backend server for user registration and authentication, Foodie allows users to discover popular recipes and rate them, search by category or name, view detailed recipe information, and build a collection of favorites.

Portfolio

[View code](#)

Tech Stack: React, Typescript, Context API, react-router, styled-components, EmailJS.

Introducing a resume application that shows my qualifications and professional achievement. The application is responsive and features both Day and Night modes. In addition, our integrated contact form, powered by EmailJS, allows you to effortlessly connect with me via email.

Blackjack

[View code](#)

Tech Stack: HTML, SCSS, Javascript, Webpack.

Project is a copy of a card game called Blackjack, written with Object Oriented Programming principles.
